

Asia Project Folder Creation with PowerShell PFM

(Project Folder Manager)

User Guide

Author: kin.yan@wsp.com

Latest update: 2024/08/06

PowerShell PFM (Project Folder Manager) is developed specifically for project folder creation in Asia. This shell is compatible with Windows Server and Windows 10/11. Following steps will guide you how to use this shell in Windows 10/11.

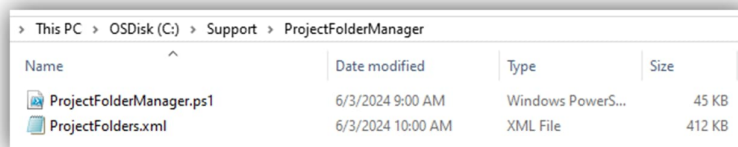

Prerequisite

Please make sure following requirements are meet before running this shell in Windows 10/11:

- PowerShell version 5.x or 7.x is installed on your system
- RSAT-AD-PowerShell feature installed
- You have an IT5 account (*Not tested with PowerShell v6.x, not sure if this shell is compatible with v6.x*)
- PFM is currently available for following offices:
China, Hong Kong, Singapore, Malaysia, Taiwan

Initial Setup:

- Copy the shell and XML profile to--->"C:\Support\ProjectFolderManager\". Never copy this shell to other folder path, otherwise you will get blank list box and unable to create project folder.

- Open a PowerShell session with your IT5 account, execute below powershell command:

Set-ExecutionPolicy RemoteSigned -Scope CurrentUser

```
Administrator: Windows PowerShell
Windows PowerShell
Copyright (C) Microsoft Corporation. All rights reserved.

Try the new cross-platform PowerShell https://aka.ms/pscore6

PS C:\Users\yan.kin> Set-ExecutionPolicy RemoteSigned

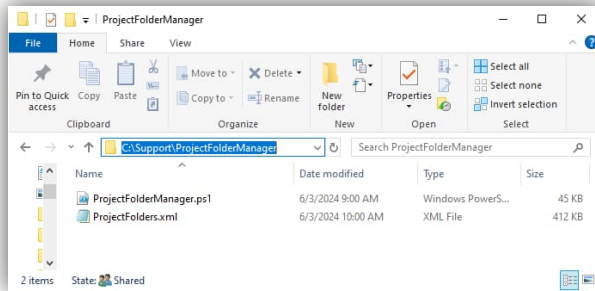

Execution Policy Change
The execution policy helps protect you from scripts that you do not trust. Changing the execution policy might expose you to the security risks described in the about_Execution_Policies help topic at https://go.microsoft.com/fwlink/?LinkID=135170. Do you want to change the execution policy?
[Y] Yes [A] Yes to All [N] No [L] No to All [S] Suspend [?] Help (default is "N"): a
PS C:\Users\yan.kin>
```

- Install RSAT-AD-PowerShell feature with below PowerShell command or you can search from internet what's the updated command to install RSAT-AD-PowerShell :

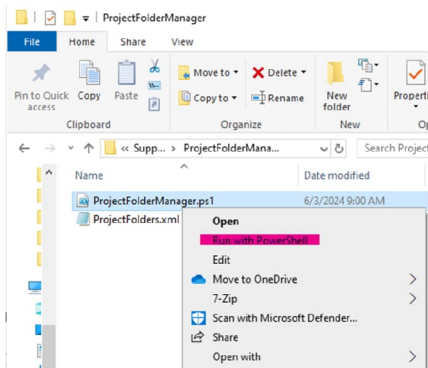

Get-WindowsCapability -Name RSAT* -Online | Add-WindowsCapability -Online

How to use this shell

1. Login Windows 10/11 with your IT5 or open a PowerShell session with your IT5 account, navigate to C:\Support\ProjectFolderManager\

2. Right click ProjectFolderManager.ps1, select “Run with PowerShell”

3. Following request(RITM) detail to select the following items, all these information will contribute to create the unique folder name and corresponding security group name:

- 1) Office (Mandatory) – Asia Office
- 2) Team (Mandatory) – Department or Team
- 3) Project No. (Mandatory) – Unique Project Number in each office
- 4) Project Name. (Optional) – Detail Project Name associate to the Project Number. Target project folder path and name will be shown besides “Project Name” label when Office, Team and Project number are not blank.
- 5) Description (Mandatory) – Will be added to the description of project AD group. Recommend to fill in RITM No.-ProjectNo-ProjectName . Eg. RITM004047831-9876540A-Test Project 234
- 6) Result – Result list box which shows the result of each task to create the project folder

Project No. 3
 12345678A

Project Name 4
 12345678A

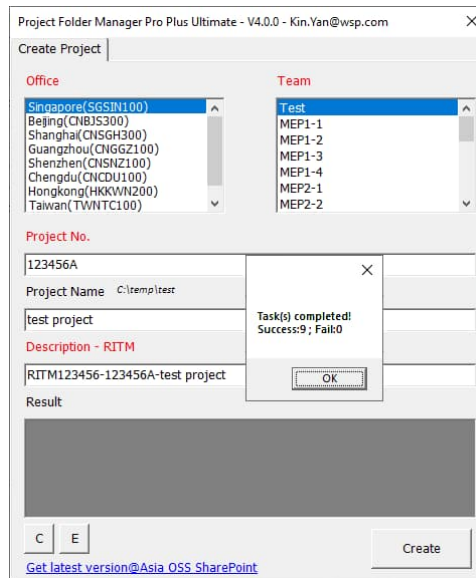

Description - RITM 5
 RITM000001-test project

Result 6
 [Result List Box]

Copy Export Create

Get latest version@Asia_OSS_SharePoint

4. Wait until the result window pop up

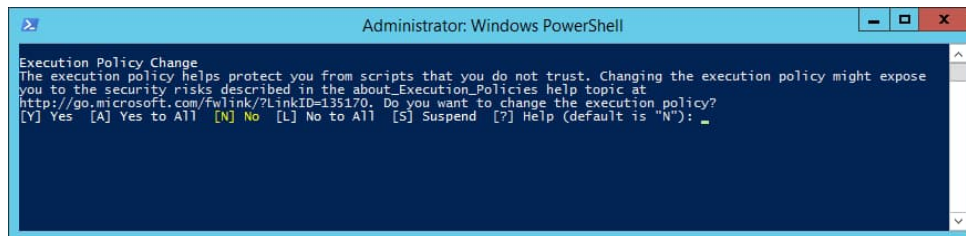

5. Check result from Result list box, which includes the AD group, Folder Creation and Permission Grant tasks, make sure all tasks are **Success**. To have an easier review to the result, you can copy the result to clipboard by clicking “C” button or export the result to a log file by clicking “E” button. Copy the full result or attach the result log file(under report folder) to the RITM as evidence. If there are any fail tasks that you have no idea how to fix it, please share the result to (kin.yan@wsp.com) for troubleshooting.

FAQ

1. A: What should I do for below question when I run the PowerShell?

Q: You might have below window occasional when you run the PowerShell, please press A so that the shell can continue.

2. A: Why I can't input more characters in Project No. and Project Name field?

Q: Due to the limitation to the length of security group name from Microsoft, Project No. and Project Name fields need to be limited to full fill the requirement, 10 characters for Project No. and Project Name is 32. Furthermore, following characters are not allowed in Project Name: \ / : * ? " " < > |

3. A: How to find the latest update version?

Q: Click on the hyperlink at the bottom of the Shell will direct you to [PFM SharePoint](#). Highly recommend you to enable “Alert me” on this folder so that you will receive email notification when new version is available
